

## Care and clean

### General cleaning instructions

- Vacuum clean and air the rug on regular basis.
- Air and dry rug always in a shady place.
- Dry the liquids immediately with clean cloth or kitchen paper. Weep stains from outer edge inwards. Avoid rubbing.
- Remove solid stains carefully e.g. with knife.
- Damp stains with clean sponge and dry. Use only cold water in blood stains. Mineral water may be used with red wine stains.
- When necessary use textile shampoo suitable for material according to instructions.
- After stain removal it is recommended to wash the whole rug.
- If you are unsure, please contact professional rug cleaner.

### Tufted polyamide rugs

Dry foam or gentle professional level wash in max. +30°C water with mild detergent. Do not soak or rub. Rinse carefully with plenty of water. Extract the excess water e.g. by a roller press. Shape the damp rug with care. Air dry flat. Do not fold. Stain resistance can be renewed after cleaning. Roll the upper surface outwards.

### Tufted polypropylene-, micro fibre- and wool rugs

Professional level wash in max. +30°C with extractor. Do not rub. Do not fold.

### Woven paper yarn rugs , wool-paper yarn rugs and cotton-paper yarn rugs

Dry foam or gentle level wash in max. +30°C water with mild detergent and soft brush. Do not soak or rub. Rinse carefully with plenty of water. Extract the excess water e.g. by a roller press. Shape the damp rug with care. Air dry flat. Do not fold. Professional level washing is recommended. Rugs are protected with stain resistance and it can be renewed after cleaning.

### Sisal rugs

Professional dry foam is recommended.

### Cotton rugs

Level wash in max. +30°C water with mild detergent. Rinse carefully with plenty of water. Extract the excess water e.g. by a roller press. Shape the damp rug. Air dry flat. Professional level washing is recommended. Cotton shrinks approx. 5% in the wash.
